| **Category** | Fairway Wood |

Custom-built Acer XV fairway wood: #3, #5 or #7, flex Lady to Stiff, graphite or steel shaft, four grip sizes, right- and left-handed.

## Description

### Acer XV Fairway Wood – built to your specification

You configure the Acer XV fairway wood yourself: choose club number, shaft, flex, grip size and hand in the option fields. The wood fits your swing and fills the gap between driver and hybrid or irons.

#### Options

- Wood #3, #5 or #7
- Flex: Lady, Senior, Regular or Stiff
- Shaft: graphite or steel
- Grip size: Undersize, Standard, Midsize or Jumbo
- Right-handed or left-handed, several colours

#### Which wood is right for you?

The 3-wood gives the most distance from the fairway. The 5- and 7-wood have more loft, launch higher and are more forgiving – a good choice for ladies, seniors and beginners. Our golf shop and workshop in Erfurt, Germany, will be happy to advise you.
