Club Conex FUSE-FIT .370 Hosel Adapter

Item number	CCFUSEFITHA
Brand	Club Conex
Manufacturer part no.	CCFUSEFITHA
Category	Club Conex Fitting System

Club Conex FUSE-FIT .370 Hosel Adapter – hochwertiges Golfzubehör von Tesi Golf.

Description

The FUSE-FIT Series hosel adapters are unique in the regard that they are epoxied over the hosel allowing a keyed pass through for the shaft to be seated within the clubs hosel. This provides comparable performance to a traditional epoxied installation while maintaining the ability to test different component configurations. Works with The FUSE-FIT Shaft Adapter and allows you to swap shafts in mere seconds. Requires FUZE-FIT assembly wrench and installation tool (all sold separately). Click on the Product Manual tab to see installation instructions.

Lightweight and durable
Made from 7075 T6 aircraft aluminum
Fits specific outside hosel diameters
The same adapter works for RH & LH golfers
Made in the U.S.A.

Click on the Product Manual (Conex - how tu use) tab to see installation instructions.
