## Description

The Acer XV is a versatile and technologically enhanced driver series available in a variety of lofts to suit players of all skill levels. The classic appearance has a lot of functionality from the addition of the Power Chamber sole, Gravity Port and CNC milled crown. The Power Chamber sole enhances energy transfer to the ball while the Gravity Port allows for fine-tuning of swingweight for different shaft weights and

balance points and custom assembly lengths. The Acer XV drivers feature our lightest all-titanium crown ever. It goes through a CNC milling process to remove excessive reduce weight than can be repositioned strategically within the head for optimal performance.

Stock screw is 7 grams and requires 4mm Allen wrench

Please note: without configuration (like added shaft grips etc.) this is only the clubhead!
