Stainless steel groove sharpener with 3 teeth each for U and V grooves. Cleans and sharpens the grooves of wedges and irons. Blue, red, silver, gold and black.

Description

Groove Sharpener U & V Blade – groove tool for U and V grooves

Clean, sharp grooves help the ball take spin, especially on wedge shots. Dirt and wear reduce that effect. The groove sharpener cleans the grooves and restores their edges. It is made of stainless steel and comes in five colours.

Specifications

Material	stainless steel
Colours	blue, red, silver, gold, black
Blades	3 teeth for U/square grooves, 3 teeth for V grooves

FAQ

Which grooves does it fit?

U (square) and V grooves.

Is it legal under the rules?

Clubs must still meet the groove specifications of the Rules of Golf after sharpening. Work carefully and

only restore the original shape.

How often should I use it?

Clean regularly; sharpen only when the edges are clearly worn.
