Description

The Juggernaut Max Utility irons are a viable alternative for golfers that prefer an iron over a hybrid or Rescue club. These can be standalone driving irons or mixed with the high-performance Juggernaut Max irons. These utility irons feature a forged, high-strength, variable face thickness face. The Flex Face technology provides for an outstanding feel and is extremely flexible for creating maximum distance. The center of gravity is strategically positioned low and forward for a penetrating ball flight compared to similar lofted hybrid club. However, the hollow body construction provides superior forgiveness compared to a conventional cavity-back iron.
