Golf Ferrule sky blue

Item number	FR1045
Brand	Hireko
Manufacturer part no.	FR1045
Category	Ferrules and Adapters

Sky blue golf ferrule for parallel tip shafts. Choose the version that matches your club head: iron, fairway wood or driver. Pre-sized outer diameter for a clean fit.

Specifications

Tip Diameter	0.355 in
Ferrule Type	Wood, Driver

Description

Golf Ferrule sky blue

The ferrule is the transition between shaft and hosel and protects the glued joint. This sky blue ferrule fits **parallel tip** shafts. It is not suitable for taper tip shafts.

Versions and outer diameter

Version	Outer diameter (OD)	fits
Iron	13.6 mm	stainless steel irons and hybrids
Fairway wood	12.2 mm	stainless steel fairway woods (newer models)
Driver	12.6 mm	titanium drivers

The outer diameter is pre-sized for common hosels, so after gluing the ferrule only needs to be turned flush with the hosel and polished.

FAQ

Which version do I need?

It depends on the club head: irons and hybrids need the iron ferrule, fairway woods and drivers the

matching wood version. If unsure, measure the hosel outer diameter with a caliper and compare it with the table.

Will it fit my shaft?

It fits parallel tip shafts. On taper tip shafts it will not sit tight; use a taper tip ferrule instead.

Can I replace the ferrule myself?

Yes, with some experience. The shaft usually has to be pulled from the head, and the new ferrule is slid onto the shaft before gluing.
