Rosemark WTP Grip
Länge: 10,5 Zoll
Gewicht:

Specifications

Weight	42 g

Description

Our NEW WTP (Wide-Top Pistol) grip with red on white MFS wrap.

The WTP is a blend of our popular Pistol Taper profile and the consistent diameter and wide face profile of the Wide-Top series in a tour-preferred smaller diameter and light weight of 42 grams .

This grip features:
?Wrapping material made of microfibre silicone beads (MFS).
?Wide-Top / 1.25 Thorn Grip Hybrid
?42 +/- 2 grams
?Lightweight conical pistol grip
?Front with constant width
?Conical inner core for best stock fit
?Patented "Always Square" hexagonal profile
What is the patented "Always Square" hexagonal profile?

Our engineers mapped the grips to the contact points of the hands and collected data that was used to create the hexagonal profile. This profile, which is present on all Rosemark grips, allows the hands to naturally grip the grip and ensures the golfer can properly control the putter for the smoothest and most consistent putting stroke.

What is our unique MFS wrap material?

Rosemark Grips' proprietary Microfiber (MF) Silicone Bead (S) material wicks away moisture while the silicone beads provide tackiness and enhanced tactile feel.

Carefully selected zones of the grip surface are free of silicone beads to promote direct contact with the super receptors of the fingers and thumbs. This promotes completely undampened feedback during ball striking, eliminating misses and improving distance control.
