Description

Shaft Adapter for Cobra DS-ADAPT Driver RH – 0.335 Custom Fit with Shaft & Grip

Upgrade your driver with this high-quality **shaft adapter for the Cobra DS-ADAPT Driver (Right Hand, 0.335 tip)**, designed for precise fitting and maximum performance customization. This adapter allows you to perfectly match your shaft and grip to your playing style for improved consistency, feel, and control.

Your setup is delivered **fully assembled on request**, including the selected shaft and grip, so your club is ready to play right out of the box.

Custom Fitting Instructions:

Please provide the following details in the order notes:

- **Total shaft length including adapter (in cm)**
  → If you want the new shaft longer or shorter, simply state the desired total length
- **Measurement point:**
  → Measure from the **start of the shaft adapter (without screw) to the end of the grip**
- **Preferred standard position** (only if Spine Alignment is selected)

The more precise your measurements, the more accurately we can build your custom shaft.

Key Features:

- Compatible with **Cobra DS-ADAPT Driver (Right Hand)**

- **0.335 tip size** for standard driver shaft compatibility
- High-quality construction for stability and performance
- Optional custom shaft & grip installation
- Ideal for club fitting, upgrades, and shaft replacement

Order your **custom Cobra shaft adapter setup** today and optimize your driver for maximum distance, control, and feel.
