Puttingmatte Private Greens Teaching-Pro – hochwertiges Golfzubehör von Tesi Golf.

Description

Private Greens Teaching-Pro Putting Mat

Putting Mat Teaching-Pro Putting Green: The perfect green for your home

The putting mat for professionals: The very short cut artificial turf made of polyamide consists of strongly interlocked fibres which have an enormous stability and flexibility. The result: excellent tracking and a consistent stimp speed. Even chipping is possible on the Teaching-Pro Green. Teaching-Pro Putting Green is suitable for indoor and outdoor use. The putting mat can also be rolled up for storage or packing away.

Height: 14 mm. Weight: 2.7 kg per square metre. Knots: 66,950 per square metre.

The length of 6 metres and width of 25 cm is ideal for checking the length and direction of long putts. Due to the small width of the putting mat, you get feedback very quickly when putting whether putts are also putted straight. Due to the length, even a small deviation in direction shows that the ball will roll off the mat if the direction is not correct. This training is a useful addition to everyday putting training that can be done easily and effectively at home. Spend less time on the putting green and still become a good putter!
