Sting Stopper vibration dampening inserts – kit with tool (12 or 36 pcs)

Item number	VA1529
Category	Tools and Accessories

Inserts that dampen shaft vibration and ease the load on wrists, elbows and shoulders. Kit with installation tool and instructions, 12 or 36 inserts.

Description

Sting Stopper vibration dampening inserts – kit with tool (12 or 36 pcs)

Sting Stoppers are installed inside the shaft and dampen the vibration that travels to the hands at impact. Golfers with arthritis or other joint problems notice the difference especially on mishits.

The 12-piece kit is a starter kit for golfers and clubmakers, the 36-piece kit is for shops that keep the inserts in stock for customers.

Specifications

Contents	inserts, installation tool, instructions
Packs	12 or 36 inserts
Effect	dampens shaft vibration

FAQ

Who benefits from the inserts?

Anyone bothered by vibration in wrist, elbow or shoulder, for example with arthritis.

How are they installed?

With the included tool into the shaft; the grip has to come off. Instructions included.

Do they change swing weight?

Slightly, because extra material sits in the shaft. Most players hardly notice it.
