Description

Replacement weight for TaylorMade R1/R11/R9/R7/R5 and MWT putters

Compatible replacement weight for TaylorMade R1/R11/R9/R7/R5 and MWT putters, available in 1–18 g. Replace a lost weight or adjust swing weight and balance.

Fits	TaylorMade R1/R11/R9/R7/R5 and MWT putters
Club type	driver, woods and putters
Available weights	1, 2, 4, 6, 8, 10, 12, 14, 16, 18 g

Why change the weight?

A heavier weight increases swing weight, so the head feels heavier during the swing; a lighter one does the opposite. Clubmaker rule of thumb: about 2 g in the head equals roughly one swing weight point.

Note: Unless expressly described as original, this item is not an original part of the club manufacturer. Brand names are the property of their respective owners and are used here only for identification.

FAQ

Which weight should I choose?

If a weight was lost, choose the same weight as before; it is usually printed on the weight. When adjusting, change in small steps and hit a few balls after each change.

How is the weight installed?

Insert it with the wrench that matches your club and tighten until the torque wrench clicks. Clean the thread first.

Is this an original part?

No. It is a compatible replacement part that matches the size and thread of the listed model.
