Description

The Acer XDS React driver combines sophisticated styling with hidden game improvement elements so not only will you look your best on the course, you will play like it too.

The Acer XDS React driver was designed for golfers who want their cake and eat it too. On one hand the XDS React driver sets up square at address. But on the other hand the addition of internal weighting within the head provides for the corrective measures that a closed face provides creating a win-win situation for golfers.

Club	Loft	Lie	weight	Face Angle	Volume	Standard Clublength	Hosel ID
Driver Right Handed	10,5 °	58 d	204 g	square	460 cc	45 in	0.335 in
Driver Right Handed	12 °	58 d	204 g	square	460 cc	45 in	0.335 in
Driver Left Handed	10,5 °	58 d	204 g	square	460 cc	45 in	0.335 in

Lastly, the XDS React's Titanium crown is ultra-thin. This allows more discretionary weight to be concentrated in the railed sole optimizing launch conditions for greater distance. Please note: without configuration (like added shaft grips etc.) this is only the clubhead!
