Item number	XM1286
Brand	Acer
Manufacturer part no.	XM1286
Category	DEALS %

Shipping from Germany

Specifications

Material	431 Stainless Steel
Bias	Neutral
Club Type	Wood

Description

Versatility in a great looking and even greater performing fairway wood is just one word to describe the Acer XF. The semi-shallow pear shape will appeal to a wide array of players from beginners to professionals. Each XF fairway uses our exclusive variable crown thickness for ultimate weight distribution, superior balance and unbelievable performance, while the variable face thickness provides an incredible sound and feel at impact.

The XF is also available in various lofts that give players options, including a 4-wood for players looking to consolidate clubs in their bag to make room for a more needed club to fill a void and provide better course management skills. Plus the 4 and 7-wood combination make great companions to the higher lofted driver options.Please note: without configuration (like added shaft grips etc.) this is only the clubhead!
