Category	Driver

Custom-built Acer XV driver: loft 9.5° to 14°, flex Lady to Stiff, graphite or steel shaft, grip size Undersize to Jumbo, right- and left-handed.

Description

Acer XV Driver – built to your specification

At Tesi Golf you configure the Acer XV driver yourself: choose loft, shaft, flex, grip size and hand in the option fields, so the driver fits your swing speed and hand size.

Options

- Loft: 9.5°, 10.5°, 12° or 14°
- Flex: Lady, Senior, Regular or Stiff
- Shaft: graphite or steel
- Grip size: Undersize, Standard, Midsize or Jumbo
- Right-handed or left-handed, several colours

Which loft is right for you?

A higher loft (12° or 14°) launches the ball more easily and suits slower swings, ladies and seniors. 9.5° and 10.5° suit faster swings. If you are unsure, our golf shop and workshop in Erfurt, Germany, will be happy to advise you.
