Aerotech SteelFiber i125 Tapered - Iron S

Item number	ATSSI125IS
Brand	Aerotech
Manufacturer part no.	ATSSI125IS
Category	GOLF SHAFTS

Aerotech SteelFiber i125 Tapered - Iron S – hochwertiges Golfzubehör von Tesi Golf.

Specifications

Ball Flight	Flach/Mittel
Torque	1.8 d
Material	Graphit/Stahl
Weight	125 g
Shaft Type	Eisen
Flex	S
Tip Diameter	0.355 in
Parallel Tip	0 in

Description

This shaft is generally preferred by stronger players that are looking to maintain the overall effort it takes to swing their steel shafted irons but wants to benefit from the vibration dampening characteristics of a composite shaft. Aerotech is able to maintain the playability of the 125 gram shaft by minimizing the wall thickness with the use of metal to increase weight instead of adding more graphite. Because graphite is 1/5th the weight of steel it would take 5 times the amount of graphite material for the same weight increase which increases wall thickness and gives the shaft a "boardy" feel. The weights of all of the SteelFiber iron shafts are manipulated using metal and graphite instead of just graphite. This is just one of the things that set the playability of the SteelFiber shafts apart from all its competitors.
