Tip Diameter	0.355 in
Raw length	40 in
Parallel Tip	0 in

Description

The SteelFiber i95 is a great transition into a lighter weight iron shaft without going too light and substantially changing the feel of the club during the swing. The 95 gram weight allows the player to see some good improvement in distance while still maintaining pinpoint accuracy and incredibly consistent distance control. If a player has been losing distance in their steel shafted irons but still wants to maintain every bit of consistency the i95 is a great choice.
