Brass shims – tip size adapter for shaft and hosel (standard, oversize)

Item number	SHIM
Brand	Hireko
Manufacturer part no.	SHIM
Category	Ferrules and Adapters

Brass shim that lets a shaft fit a head with a larger hosel. Standard for 0.335" into 0.350" or 0.355" into 0.370", oversize for 0.335" into 0.370" or 0.370" into 0.395".

Description

Brass shims – tip size adapter for shaft and hosel (standard, oversize)

Shims are the quickest way to glue a shaft with a smaller tip securely into a larger hosel. The thin brass sheet wraps around the shaft tip and fills the gap so the shaft sits centred and firm.

The standard version is for small gaps, the oversize version for larger differences between shaft and hosel.

Specifications

Standard	0.335" shaft into 0.350" hosel or 0.355" taper tip into 0.370" hosel, approx. 0.75 g
Oversize	0.335" shaft into 0.370" hosel or 0.370" shaft into 0.395" hosel, approx. 1.6 g
Material	brass

FAQ

Which version do I need?

Measure the shaft tip and the hosel inner diameter. Small difference: standard; large difference: oversize. The table examples help.

How is the shim installed?

Roughen the shaft tip, wrap the shim around it, coat with epoxy and push the shaft into the hosel.

Does the shim add weight?

Hardly: standard approx. 0.75 g, oversize approx. 1.6 g.
