Bushing Ferrule for 0.335 Shafts in 0.400 Heads

Item number	BB7006
Brand	Hireko
Category	Ferrules and Adapters

Bushing ferrule (reducer) for woods: lets shafts with a 0.335" tip fit club heads with a 0.400" hosel.

Description

Bushing Ferrule for 0.335 Shafts in 0.400 Heads

The bushing ferrule bridges the gap between shaft tip and hosel, so a shaft with a 0.335" tip diameter can be glued firmly and cleanly into a head with a 0.400" bore. Hand sand the bushing to fit.

We are happy to do the assembly in our workshop in Erfurt, Germany.

- Shaft tip 0.335" → hosel 0.400"
- For woods
- Hand sand to fit
