Club Conex FUSE-FIT .370 hosel adapter

Item number	CCFUSEFITHA
Brand	Club Conex
Manufacturer part no.	CCFUSEFITHA
Category	Club Conex Fitting System

Hosel adapter made of 7075-T6 aluminium that is glued over the hosel. With the FUSE-FIT shaft adapter, .370 shafts can be swapped quickly for fitting. Three sizes by hosel outer diameter.

Description

Club Conex FUSE-FIT .370 hosel adapter

The FUSE-FIT hosel adapter is glued onto the outside of the hosel and forms a detachable connection with the FUSE-FIT shaft adapter. You can test different shafts on the same head, and performance is very close to a glued-in shaft.

Fits right- and left-handed heads, made in the USA. Also required: FUSE-FIT shaft adapter, wrench and installation tool (sold separately). Please follow the Club Conex instructions.

Specifications

Shaft	.370 in
Material	7075-T6 aluminium
Sizes	3, by hosel outer diameter (approx. 0.520 to 0.570 in)
Hand	right and left

FAQ

What is the hosel adapter for?

For fitting clubs where shafts are swapped often without regluing every time.

Which size fits?

Measure the hosel outer diameter with a caliper and choose the matching size.

What else do I need?

The FUSE-FIT shaft adapter, the FUSE-FIT wrench and the installation tool.
