Colour-coded shaft extenders for steel and graphite shafts (0.470–0.575 in)

Item number	PGGS
Brand	Hireko
Manufacturer part no.	PGGS
Category	Extenders

Nylon-coated plastic shaft extenders in 13 colour-coded sizes, for almost all graphite and the most common steel shafts. Up to 2 inches extension, not for putters.

Description

Colour-coded shaft extenders for steel and graphite shafts (0.470–0.575 in)

No more guessing, sanding or masking tape to make a thin extender fit. The colour-coded extenders fit almost all graphite shafts and the most common steel shafts. Use them to lengthen a club by up to 2 inches (not for putters).

A gauge helps you find the right size: push it gently into the butt end and take the colour code that still just fits. Always glue the extender with 24-hour epoxy.

Specifications

Sizes (inner diameter of the butt)	0.470, 0.485, 0.490, 0.495, 0.500, 0.5075, 0.515, 0.5225, 0.530, 0.5375, 0.545, 0.560, 0.575 in
Material	nylon-coated plastic
Max. extension	2 inches (not for putters)

FAQ

How do I find the right size?

With the extender gauge: push it gently into the butt end; the colour that just fits is your size.

Which glue should I use?

24-hour epoxy for a durable bond.

Can I extend a putter?

These extenders are not intended for putters.
