Crossgolf iron 8

Item number	CROSS-ACER-XVHT-8
Category	Irons

Robustes Crossgolf-Eisen #8 mit extra breiter Sohle: gleitet über Wiese, Schotter und harten Boden und bringt den Ball leicht in die Luft. Graphitschaft und Karma-Griff, in der Tesi-Werkstatt in Erfurt für dich gebaut.

Description

Crossgolf iron #8: one club for meadows, parks and the city

In crossgolf you play where there is no manicured fairway: meadows, wasteland, gravel or industrial sites. That calls for a forgiving club that does not dig into the ground. Our crossgolf iron is based on the **Acer XV HT #8**, an iron head with a sole about 30% wider than a regular iron.

Why this head?

- **Wide sole:** glides over grass, hard ground and loose surfaces instead of digging in.
- **37° loft:** the ball launches easily, so you can chip, pitch and hit full shots, almost everything with one club.
- **Very forgiving:** shallower face, also well suited to beginners and slower swings.

Specifications

Head	Acer XV HT iron #8, loft 37°, lie 63.5°, bounce 3°
Shaft	Graphite, absorbs shock on hard ground
Flex	Lady, Senior, Regular or Stiff
Grip	Karma Black Velvet, good hold even in damp weather

Hand	Right-handed

Built in our workshop

Every club is assembled in the Tesi workshop in Erfurt. If you are taller or shorter than average, we are happy to adjust length and lie. Just write to us. Delivery usually takes 7-10 working days.

FAQ

Which flex suits me? Most recreational players do well with Regular. Slower swingers choose Senior or Lady, very fast swingers Stiff.

Can I also use the club on the golf course? Yes, it is a full 8 iron and fits in any bag.

Which balls are suitable for crossgolf? On public ground, soft crossgolf or practice balls are best so nobody gets hurt. Please only play where it is allowed.
