High Tensile Forged Bronze Bending Bar

Item number	150635
Brand	GolfMechanix
EAN/GTIN	5027084365943
Manufacturer part no.	150635
Category	Tools and Accessories

Clubmaker Bending Bar mit Messing zum Biegen von Schlägerköpfen – hochwertiges Golfzubehör von Tesi Golf.

Description

A superb bending bar that uses a high tensile bronze alloy that's been hot forged to shape and then CNC machined to slip perfectly over the hosel of woods and irons.

Forging a ductile alloy flows, compacts and refines the metal structure, which further improves the mechanical properties of the alloy. The result is a bending bar that has a high yield strength and improved ductility with a non marring, non galling metallic structure well suited for handling today's

forged irons and irons that have undergone sophisticated finishing steps. One key feature of this bending bar is that we made the bits fully interchangeable, giving the clubmaker 3 sizes to choose from. 13 mm for drivers and fairways, 14 mm and 16 mm for irons. The 14 mm bit is the default option.
