## Descrizione

## KBS C-Tapered Steel golf shaft

Inspired from Tour player feedback, the KBS C-Taper shaft builds on the KBS Tour shaft design, offering an innovative balance of performance and feel targeting aggressive players that have a rapid swing tempo and high shot trajectory. Designed to complement the KBS Tour shaft, the all-new KBS C-Taper design is specially modified through the taper and tip section to produce a lower trajectory and reduced ball spin without sacrificing the signature feel and distance gains players enjoy from KBS. Introduced in 2011, the KBS C-Taper shaft is already tour proven and trusted by several of the top Tour players in the world today. The KBS C-Taper shaft is offered standard in their signature Satin Brushed finish.
