KBS Hi-Rev 2.0 Wedge Steel Tapered - Xtra Stiff Flex

Item number	KB11-IX
Brand	KBS
Manufacturer part no.	KB11-IX
Category	GOLF SHAFTS

Versand aus Deutschland

Specifications

Ball Flight	Low
DSFI Range	not yet verified
Material	Steel
Weight	135 g
Shaft Type	Wedge
Flex	X-Xtra Stiff, X
Tip Diameter	0.355 in
Raw Length	37 in
Parallel Tip	0 in

Description

KBS Hi-Rev 2.0 Wedge Steel Tapered - Xtra Stiff

In early 2010, the USGA put into effect a series of groove rule changes designed to reduce the amount of spin caused by modern club heads. On TOUR and in the industry, the USGA found players were no longer penalized effectively for hitting carelessly. In essence, modern grooves afforded players too much control, by generating more spin, from all shot conditions.

Naturally, high-caliber players immediately began looking for other solutions to gain back lost spin hence the KBS Hi-REV. Using the KBS Tour step pattern, KBS has created a shaft that imparts a noticeable increase in revolutions per minute (RPMs) helping players maintain shot control.

Designed to fit major manufacture's pro-line irons and wedges requiring a 0.355" taper tip shafts or use a brass shim for 0.370 inch hosel clubheads
