Description

Get repeatable results with the Acer XDS React Hybrid. The Acer XDS React Hybrid features the same amount of face progression through the set, as well as conistent crown heights. This means that you won't need to readjust your setup for varying clubs, resulting in a repeatable swing every time. The railed soles glide across various types of terrain increasing solidness of contact. Plus, with the leading edge designed well forward of the hosel prevents the possibility of shanking the ball. The XDS React hybrids are the outcome of unconventional thinking for remarkable results.Please note: without configuration (like added shaft grips etc.) this is only the clubhead!
