Mitsubishi-Rayon Diamana RF Series 50 S-Flex

Item number	MX595-WS-1A
Brand	Mitsubishi-Rayon
Manufacturer part no.	MX595-WS-1A
Category	DEALS %

Mitsubishi-Rayon Diamana RF Series 50 S-Flex Golfschaft – hochwertiges Golfzubehör von Tesi Golf.

Specifications

Ball Flight	Mid
Torque	4.3 d
Weight	58 g
Tip Diameter	0.335 in
Raw length	46 in
Parallel Tip	3 in
Driver Carry	220-235 m (240-259 yds)

Description

Mitsubishi-Rayon Diamana RF Series 50 S-Flex

Overview

We?ve taken our tour proven, time tested Red Board profile and enhanced it using Mitsubishi Chemical's latest design and material innovations, to create the next generation Diamana RF-Series. Strategically positioned DIALEAD Pitch Fiber, MR70 and boron fiber infused hybrid prepreg deliver unmatched strength, stability and performance from this higher launching profile.

Engineering

The Diamana RF-Series represents the next generation version of MCA GOLF?s signature "active" bend profile. The new RF-Series, like its most recent predecessor the Diamana R-Series, incorporates high-strength DIALEAD Pitch Fiber by Mitsubishi Chemical into the butt-section of the shaft, adding unprecedented strength and control during shaft loading and unloading.

Featured Material: MR70

The new Diamana RF-Series incorporates for the first time a new hybrid prepreg developed by the engineers at Mitsubishi Chemical. This new prepreg combines boron fiber and Mitsubishi Chemical?s latest carbon fiber innovation MR70. Mitsubishi Chemical?s MR70 by is 20% stronger and has 10% higher modulus than conventional carbon fibers. Strategically positioned in the tip-section of the shaft this hybrid prepreg provides unprecedented strength and stability at impact.
