## Description

## Mitsubishi TENSEI 1K Pro Hybrid – graphite shaft for hybrids

The Pro Hybrid combines a balanced flight with a counterbalanced construction and smooth feedback. Manufacturer flight profile: **Launch mid, Spin mid**.

### Construction and technologies

- **1K carbon in the handle:** The tightly woven 1K carbon helps create a defined feel and strength in the upper shaft.
- **Counterbalanced design:** Additional mass towards the handle influences balance and feel, especially with heavier clubheads.
- **Pro technology for hybrids:** Mitsubishi blends elements of the 1K Pro woods into a dedicated mid-launch, mid-spin hybrid profile.

The nominal weight class is not the actual shaft weight. Figures are manufacturer specifications for the raw shaft; finished builds may differ. Ball flight and feel depend on the full club build and swing. Tesi Golf recommends an individual fitting.
