Description

Mitsubishi TENSEI 1K Pro Orange – graphite shaft for drivers and fairway woods

The original Pro Orange combines counterbalancing with handle-side tungsten and a reinforced tip. Manufacturer flight profile: **Launch mid, Spin mid-low**.

Construction and technologies

- **1K carbon in the handle:** The tightly woven 1K carbon helps create a defined feel and strength in the upper shaft.
- **Tungsten in the handle:** This earlier Pro Orange generation uses added tungsten towards the handle for counterbalancing.

- **Xlink Tech Resin System:** Mitsubishi’s resin process supports a carbon-rich construction, balancing strength and feedback.
- **MR70, boron and Xlink in the tip:** MR70 carbon, boron and Xlink Tech contribute to reinforcement of the tip section.

Who is this shaft for?

The nominal weight class is not the actual shaft weight. Figures are manufacturer specifications for the raw shaft; finished builds may differ. Ball flight and feel depend on the full club build and swing. Tesi Golf recommends an individual fitting.
