Raw length	42 in
Parallel Tip	9.88 in

Description

SK Fiber Tour 90 HL Steel – Iron Shaft (R/S Flex)

The **SK Fiber Tour 90 HL Steel Iron Shaft** is a **high-performance, lightweight steel shaft** designed specifically for today's stronger-lofted **game-improvement irons**. Weighing only **105 g**, it delivers the ideal combination of **balance, control, and feel** – allowing golfers to swing with less effort while maximizing distance.

Thanks to its **High Launch design**, the shaft promotes a mid-to-high ball flight, helping players achieve optimal trajectory and additional stopping power on the greens.

The SK Fiber Tour 90 HL comes in a **dual R/S flex profile**: by tip trimming, the shaft can be configured as **Regular or Stiff**, making it a versatile choice for a wide range of swing speeds.

Specifications:

- **Model #:** SK128534
- **Weight:** 105 g
- **Flex:** R/S (Regular / Stiff Trim Code)
- **Torque:** — (optimized for stability)
- **Butt Diameter:** 0.600″
- **Tip Diameter:** 0.370″ (Parallel Tip)
