Category	Tapes and Glue

Brampton's fastest shafting adhesive – cured in 10–20 minutes.

Description

Brampton Pro-Fix 5/10 Rapid Cure epoxy: Brampton's fastest shafting adhesive

Contents: 25 ml (0.85 oz).

Pro-Fix 5/10 Rapid Cure is Brampton's best seller: the adhesive reaches the same impact strength as 24-hour products, yet is ready for use after just 10–20 minutes at room temperature. Perfect for quick repairs, fittings and tournament service.

Features

- Two-component epoxy, 1:1 mixing ratio
- Working time approx. 3–5 minutes
- Fully cured after 10–20 minutes (longer in the cold)
- Excellent adhesion to steel and graphite shafts
- Very easy to use, easy to clean up

Tip

Because of the short working time, only mix as much as you can use within a few minutes. For larger batches we recommend Pro-Fix 15/30 Quick Cure or 20/20 Long Cure.
