Brampton Shafting Beads – Glass Beads for Shafting Epoxy (approx. 100 Clubs)

Item number	SB
Brand	Brampton
Manufacturer part no.	B241-GB4
Category	Tapes and Glue

Glass beads for epoxy – the shaft sits centred in the hosel. Contents for approx. 100 clubs.

Description

Brampton shafting beads: glass beads for perfectly bonded shafts

Contents: enough for approx. 100 clubs.

Shafting beads are specially made fine glass beads that you add to the epoxy when shafting. They make sure the shaft sits exactly centred in the hosel and the adhesive is distributed evenly. This increases the strength of the bond – especially important for players with high swing speeds.

Advantages

- Shaft sits centred in the hosel
- Even glue line without voids
- Stronger bond
- Suitable for all Brampton Pro-Fix epoxies

Use

Stir approx. 4–6 % shafting beads into the mixed epoxy and apply as usual.
