Brampton Tape Remover – Grip Tape Scraper for Steel and Graphite Shafts

Item number	BRP06
Brand	Brampton
Manufacturer part no.	scraper
Category	Tools and Accessories

Removes old grip tape without scratching the shaft – lead tape too.

Description

Brampton tape remover: remove old grip tape without scratches

The Brampton tape remover scrapes old grip tape and adhesive residue cleanly off the shaft – without scratching graphite or steel shafts and without an extra shaft clamp. It also removes lead tape. The tool is extremely durable and can be resharpened (follow the contour).

How it works

Stand the shaft with the butt end against a firm stop, place the remover at an angle of approx. 25–30° and scrape the tape away from your body. With several layers it helps to warm the tape slightly first.
