Schaftwechsel- und Reparatur Service – hochwertiges Golfzubehör von Tesi Golf.

Description

Shaft replacement and repair service for golf clubs

Here you will find our workshop and repair service for your golf clubs in Erfurt. We offer professional repair and shaft replacement services for your golf equipment, including irons, drivers, woods, fairway woods, hybrids, rescue clubs and putters.

We will strip your old shafts from the heads, clean them and prepare them for re-gluing to your new shafts. (Shafts and grips must be ordered separately) Please always let us know the current lengths of the respective heads

Is your shaft broken or would you like new shafts in your golf set?

Then you have come to the right place. We have the appropriate tools and offer to prepare the heads for the new shafts. We remove the shafts, drill out your club head and clean the hosel (note: the hosel is the part of the head where the shaft is inserted). This prepares your head for new shafts. For new shafts it is important to know the correct hosel diameter in order to choose the right shaft. You can also drill out the hosel or use shims to fill the "gap in the diameter" so that the shaft is still correctly centered in the hosel.

What information is important

When you order a shaft replacement, it is important to know the length of the shaft you need. So please measure one cm next to the club and give us the measurement from the end of the head (end of the hosel!). Please do not measure the plastic sleeve (ferrule)! Ideally, you should send us the complete club (i.e. with the broken shaft) or, in the case of an iron set, a second iron so that we can determine the correct length of the club for you.

In our shaft store you have a large selection of shafts from well-known brands such as KBS, Aldila, Mitsubishi, Fujikura, Graffaloy, Apollo, True Temper to name just a few of the most important. We are also happy to advise you on choosing the right shank.

Our quotation includes all work and materials including handle assembly, the costs for the stock and handle are additional.

Golf club shaft service and repair in Erfurt, we offer professional repair and shaft replacement services.

Our offer for your golf equipment, whether irons, drivers, woods, fairway woods, hybrids or rescue clubs includes:

-Removing old shafts
-Cleaning and preparing the club heads for new shafts
-Preparing the hosels for new shafts
-Advice and selection from a variety of high-quality shafts from well-known brands such as KBS, Aldila, Mitsubishi, Fujikura, Graffaloy, Apollo, True Temper and more

If you would like to take advantage of our service, please specify the lengths of your golf club heads. Ideally, you should send us the complete club or at least a second copy so that we can determine the correct length for you.

Our quote includes all labor costs and consumables. The costs for shafts and grips are additional.

Rely on our expertise for the maintenance and repair of your golf clubs. Book our workshop service for golf clubs in Erfurt, Thuringia today.
