| **Brand** | Brampton |
| **Manufacturer part no.** | Suretape |
| **Category** | Tapes and Glue |

Professional grip tape made of double-coated crepe paper – roll for approx. 120 grips.

## Description

### ShurTape grip tape 50 mm – professional grip tape for the workshop

Roll 50 mm x 32.9 m (36 yds), enough for around 120 grips. Double-coated crepe paper, adheres to steel, graphite and titanium.

Double-sided grip tape is the basis of every grip installation: it holds the golf grip securely on the shaft and is activated with a grip solvent such as Brampton HF-100 so that the grip slides on easily.

#### Features

- Roll 50 mm x 32.9 m (36 yds), approx. 120 grips
- Double-coated crepe paper, crease-free
- Adheres to graphite, steel and titanium
- Store cool, dry and away from light, use within 12 months

#### How to apply the grip tape

1. Remove old tape and adhesive residue from the shaft.
2. Stick the tape lengthwise onto the shaft, about 1 cm beyond the butt end.
3. Push the overhang into the butt end and peel off the backing paper.
4. Apply grip solvent and slide on the grip.
