SuperStroke Zenergy Tour Putter Grip

Item number	STPZ-Tour
Brand	SuperStroke
Category	Putter Grips

Parallel putter grip with No Taper Technology – the most popular SuperStroke profile.

Description

SuperStroke Zenergy Tour: the most popular SuperStroke profile

The Zenergy Tour series has the classic parallel profile that made SuperStroke famous. The grip keeps the same thickness from top to bottom. This lowers grip pressure, quietens the hands and keeps the putter head on a consistent path.

Features

- No Taper Technology: the same thickness from top to bottom for even grip pressure
- Enhanced SPYNE: a ridge on the underside for a repeatable hand position
- Multi-zone texture for feedback and hold
- Available as Tour 1.0, 2.0, 3.0 and 5.0 – the higher the number, the thicker the grip

Note

The CounterCore counterweight is not included. SuperStroke backweights are available separately.
